

360 Education Business Analytics Platform

Power BI Project Documentation

Project Overview

This project is a Power BI-based 360 Education Business Analytics Platform with an Executive Overview Dashboard. The report brings together multiple education-business areas to support KPI monitoring and interactive analysis.

Tool

Microsoft Power BI, Power Query/Data Transformation, DAX, and Power BI Data Modeling.

Dashboard

The report contains an Executive Overview Dashboard titled "360 EDUCATION BUSINESS ANALYTICS PLATFORM". The layout includes KPI/card-style visuals and interactive analytical elements. Branch-level analysis is supported, including a branch filter example for Karve Nagar.

Data Model

Business / Model Area	Purpose in the model
Admissions	Admission-related analysis
Branches	Branch-level analysis
Calls	Call-related measures and analysis
Courses	Course-related analysis
Fees	Fee-related business information
Leads	Lead tracking and lead measures
Marketing	Marketing analysis and measures
Placements	Placement-related analysis
Students	Student-level analysis and measures
Employees	Employee-related information
Date Table	Date-based analysis
Revenue Measures	Revenue KPIs/measures

Project Workflow

1. Data integration → 2. Data transformation → 3. Data modeling → 4. DAX measure creation → 5. KPI development → 6. Dashboard design → 7. Interactive analysis → 8. Executive reporting.

Objective

The objective is to convert education-business data into an interactive executive dashboard that helps users monitor important metrics and explore business performance.

Repository Note

The PBIX file is the primary project artifact. Separate dashboard screenshots are not included because the dashboard visuals are already available in the project presentation.
